A practice assessment is a comprehensive approach to reviewing a physicians' practice to assess adherence to established professional practice standards across multiple domains using multiple assessment strategies. Practice assessments are completed by trained peer assessors and may integrate a records review, interviews with colleagues or co-workers, direct observations of interactions with patients, and patient questionnaires to enable the development of a comprehensive report of the overall quality and safety of the practice with recommendations that serve as the basis for future learning and improvement.

A practice assessment is required to determine clinical competence in the workplace, suitability in the practice location and eligibility for an independent practising licence or defined licence.

The College will contact you with further information and instruction.
